Date: Saturday, April 18 Time: 9:00 am – 4:00 pm

Place: Forks Community Hospital Fee: \$45.00

DVD

First Aid/CPR/AED for the Workplace

Trained. Empowered. Prepared.

- **Meets OSHA's Guidelines for First Aid Programs**
- **Updated with the latest Science for First Aid, CPR and Emergency Cardiovascular Care**
- **Flexible Delivery**
- **Superior Quality**

American Red Cross health and safety training is the complete emergency preparedness solution that's smart for your employees and your bottom line. In fact, OSHA studies show a \$4 to \$6 return for every dollar invested in health and safety training, with improvements in the costs associated with absenteeism, workers' compensation claims and productivity.

New First Aid/CPR/AED Program Now Available

In our revised First Aid/CPR/AED program, we've incorporated the latest science for first aid, CPR and emergency cardiovascular care and added a wealth of educational innovations to enhance the learning experience of your employees. The Red Cross translates scientific and medical research into training that can provide everyday people with the skills that may help them one day save a life.

What's New?

- An innovative and engaging "practice-while-you-watch" instructional method allows learners to perform skills along with a video, while a classroom instructor provides more individual guidance.
- A new training DVD is customized with the specific types of emergency scenarios that are likely to occur in a workplace environment, enhancing the relevancy of training for your employees.
- New participant materials support the learning process and provide an excellent refresher and reference after training.

Flexibly Delivery

Depending on your needs, courses can be presented at your location or your local Red Cross chapter. You can also send select employees to our train-the-trainer courses, which prepare them to train the rest of your staff.

For more information, contact the Olympic Peninsula chapter at (360) 457-7933 or archealthandsafety@olypen.com
