

Forks Community Hospital

"Pioneers in Rural Health Care"

June 5, 2020

Forks Community Hospital's official vision is "Uniting the community. Improving lives." This vision guides the development of our policies and how we shape our inclusive delivery of care.

The Forks Community Hospital Administration and the Board of Commissioners respond to all allegations of racism guided by a strong commitment to diversity and inclusion, making care available for all who walk through our doors. Forks Community Hospital leadership and staff share a zero tolerance for acts of racism within our organization and towards patients, families, and our greater community.

We sincerely thank those who have recently raised concerns regarding this topic, and we commit to continue to partner with our community to bring about change and support in the creation of a national healthcare institution that treats all people with respect and dignity and justice.

Respectfully,

Heidi Anderson
Chief Executive Officer
