# Same Day vs. Walk In

## Walk In

Walk in visits in a clinic setting are not pre booked. You must physically walk in to the clinic to be seen by a provider and then are seen in order of arrival or severity of your medical need. Walk in patients do not call ahead.

## Same day

Same day appointments are just that; they are scheduled that day. We have a daily schedule for these visits and they are pre booked by calling into the clinic the day of. With one provider serving this need we have a limited number of those visits available on a daily basis. For one provider the max is usually 18 to 20 in a day so if you need to be seen call early as appointments fill up fast.

## Get in touch

 (360) 374 - 6998

**Call early to  
schedule your same  
day appointment.**

## Remember

### Call Early

Same day appointments are booked that day. All 18 - 20 appointments are often scheduled prior to lunch.

### That Day

Same day appointments can not be booked in advance. Our same day provider often sees 18-20 patients each day.

### Routine Care

Same day appointments should not replace visits with your primary care provider.
